

The Dickinson Statement

A MIND BOGGLING THESIS

by
Ian E. Stephens

This thesis has been produced in this more convenient form because of the unprecedented demand for the original, more bulky paper. Although there is some 'updating' and some expansion of the earlier text, the concept and the data remain unaltered.

A sincere "thank you" is tendered to those people of perception and dedication who, having studied the original document, expressed their appreciation and concern.

However, despite the self-evident truth within these few pages, there will be those who will still not be able to accept the "mind-boggling" facts. To these the author pleads, in the name of humanity, for additional research and deeper contemplation.

There will be those too, who for divers reasons, including the devilish motives set out herein, and in total absence of any scientific or logical refutation of "The Dickinson Statement" will attempt to denigrate the author and his work.

To the many individuals and organisations who, screened from criticism and punitive action by their social honours, academic graffiti, by our strange defamation laws and secured from blame by the passage of time, advocate the unrestricted feeding of rat and rabbit poison to infants goes this message:-

"May the Lord have mercy on your
souls because you deserve no mercy,
only contempt from your fellow man!"

Brings some of the supposedly more sensational anecdotes
about FLUORIDE / FLUORINATION into alarming perspective

The Dickinson Statement

FOREWORD

Because his book, "World Without Cancer" contained considerable research by the author, G. Edward Griffin, into the dark recesses of the pharmaceutical industry, research which confirmed in no small measure this thesis, a draft copy went to him. His comment is reproduced on the facing page as a concise 'foreword' .

G. Edward Griffin is well known because of his unique talent for researching obscure and difficult topics and presenting them in clear, precise terms that all can understand. He is the author of numerous documentary books and films on such diversified and controversial subjects as the United Nations, the Supreme Court, the John Birch Society, the Communist Party, U.S. foreign policy, international banking, and in "World Without Cancer", the science and politics of Cancer therapy.

He is a graduate of the University of Michigan and is currently the president of a publishing and audio-visual production company in Southern California.

Ian E. Stephens.

December 17, 1987

Mr. Ian Stephens
63 Purches Street
Mitcham 3132
Australia

Dear Mr. Stephens,

This is in reply to your letter of
December 3rd.

The information you sent was, indeed, interesting. Frankly, you have gone deeper into the I.G. Farben/Flouride connection than I have. I am definitely aware of the flouride "myth" regarding caries, and I was aware that Farben was involved, but the exact connection and the interlock to the American Foundations is new to me.

Thank you for sending this information.

Best regards

A handwritten signature in cursive script, appearing to read "G. Edward Griffin".

G. Edward Griffin

WHY THE TITLE?

"Evil men prosper when good men do nothing"
Edmund Burke.

This story has a beginning, it has a middle but it has no ending. The 'ending' will undoubtedly be written in countless hospital records, on tiny grave stones, in the bones of the crippled and on the hearts of the bereaved. Even so, the true cause of the 'ending' will never be advertised. One record that slipped past the establishment net is duplicated herein but, believe it or not, the existence of this 'death certificate' has been denied, in writing and to overseas scientific inquiry, by Australian administrations.

What follows is but a fractional part of the 'middle' of a story that began back before the turn the century and which was provoked by a statement contained in an "Address in Reply to the Governor's speech to the Parliament", as recorded in Victorian Hansard of 12 August 1987, by Mr. Harley Rivers Dickinson, Liberal Party Member of the Victorian Parliament for South Barwon.

Hence the title.

The relevant HANSARD abstract is reproduced herewith. It is emphasised that the writer imputes Mr. Dickinson with no other responsibility for the contents of this thesis than being the Parliamentary 'trigger' which motivated it and the researched data which it contains.

At the end of the second world war, the United States Government sent Charles Eliot Perkins, a research worker in chemistry, biochemistry, physiology and pathology, to take charge of the vast Farben chemical plants in Germany.

While there he was told by German chemists of a scheme which had been worked out by them during the war and adopted by the German General Staff.

This was to control the population in any given area through mass medication of drinking water. In this scheme sodium fluoride occupied a prominent place.

Repeated doses of infinitesimal amounts of fluoride will in time reduce an individual's power to resist domination by slowly poisoning and narcotizing a certain area of the brain and will thus make him submissive to the will of those who wish to govern him.

Both the Germans and the Russians added sodium fluoride to the drinking water of prisoners of war to make them stupid and docile.

DEDICATED to my grandchildren, to their peers and to their offspring with the wish that they will be allowed to build a less corrupt, less greedy society and create a cleaner world.

Ian E. Stephens.
1987.

In a book recently written by a Dr. Hans Moolenburgh of Haarlem, Holland, called "Fluoride-The Freedom Fight" the author describes the ultimately successful endeavours to free the Dutch people from water fluoridation. (Those endeavours included the only properly conducted double blind study ever done any where in the world, into the effects of tap water fluoridated at one part of fluoride to 1,000,000 parts of water (1ppm)).

One brief passage is headed "PERKINS" and a reproduction of that section gives sufficient confirmation of the "DICKINSON STATEMENT" as printed in Hansard, by a remote and independent source, to reinforce the need for additional investigation into this one 'behaviour control' aspect of the "fluoride debate" and relate it to 1987.

The entire 'Perkins' paragraph is reproduced on the following page.

Elsewhere in his book, Dr. Moolenburgh also relates how that first 'Perkins' anecdote was confirmed in differing ways and from reliable independent sources.

INDUCED APATHY

"The man in the street does not notice the devil even when the devil is holding him by the throat"

Johann von Goethe.

Actually there is little that is novel in the concept of controlling the minds and manners of the multitude by chemical/dietary means. That it was practised by a totalitarian Hitler regime is made the more credible when we know that as far back as 1938 the United States Government, an ally to boot, and the Government of a democratic, Christian country was considering the transformation of American citizens and others into 'zombies' by a number of proposed techniques. The U.S., Army searched for "the perfect incapacitating agent" according to General Fellenz, "to put in the enemy's water supply". Included in the drugs tested were the hallucinogenic "LSD" and the amesiac "BZ" (10 times more potent than LSD.) and a "schizophrenic agent called bulbocapine".

Perkins

When 1971 was drawing to a close, I received a paper containing a strange story. This story was to haunt us repeatedly throughout the long, drawn-out battle. It was a story resembling science fiction - bizarre and unbelievable. There are those who warned me not to even mention this story, and I can appreciate why. On the other hand, the task of a historian is not to relate things as they should have happened, but as they actually did happen.

What did happen was that this crazy story appeared just like Kilroy in the Second World War, even though no one ever met him. So, with apologies to my friends, I still include Perkins. Perkins *did* happen, even if he perhaps never existed. The Perkins saga was different from other fluoride stories.

The story of industries hoodwinking the public into buying a pollutant as medicine is simply a 'whodunnit'. Grotesque though it may sound, it is no more than 'the consumer fraud of this polluted century' (as described in *Fluoridation and Truth Decay* by Gladys Caldwell). But the story I now read was different: it gave one the cold shivers. It told of a chemical engineer, Mr Perkins, who related how immediately after the Second World War he was one the Americans put into the well-known IG Farben Company in Germany. There he discovered that IG Farben had developed plans during the war to fluoridate the occupied countries, because it had been found that fluoridation caused slight damage to a specific part of the brain. This damage had a very particular effect. It made it more difficult for the person affected to defend his freedom. He became more docile towards authority.

Scientists in the camps of both the opponents and proponents have always dismissed this story as mere poppycock, but it had a life of its own and reared its head time and again. It fed the suspicions of many people that 'there was more to fluoridation than meets the eye'.

As far as I know, there is no one who has done any serious research into whether the fluoridated person is really more docile, easier to rule, more impressed by authority than the non-fluoridated one. There is, though, one peculiar thing: every Dutch doctor has a medical reference book listing all the current remedies. I have in front of me the book for 1984. One of the chapters is entitled 'Tranquillisers'. Looking at the 'minor tranquilisers' I find twenty-four substances: their chemical formulae do not show any connection with fluoride. However, there is also a heading 'major tranquilisers'. Of those there are twenty-seven, and seven of them are a fluoride compound. One of these is semap. It is one of the strongest anti-psychotic substances we know. This means that twenty-five per cent of the major tranquilisers are connected with fluoride. I do not draw any conclusions. The only thing one can say at this point is, with Alice: 'curtiouser and curiouser!'

The "Rockerfeller Report" to the United States President on CIA activities said:- "The drug program was a part of a much larger CIA program to study possible means of controlling human behaviour".

One drug which received special attention, in the fifties and early sixties under the cryptonym of Mdelta and/or MRultra, was SUXAMETHONIUM CHLORIDE (listed under a number of product names including "Anectine"). A halogenated "ANTI-CHOLINERGIC AGENT" with all of the symptomatic side effects up to and including "cardiac arrest" ascribed to these "agents" in the medical literature.

Please retain the term "anti cholinergic agent" in mind, for owing to the health implications attendant on this particular anti-metabolic activity, it figures repeatedly in this thesis.

NOTE:- An adviser to the United States Government on "Hypnotism" or psychological behaviour control, Dr. George Estabrooks later became Chairman, Department of Psychology, COLGATE UNIVERSITY. Internationally, Colgate was and remains the most ardent producer and advocate for the fluorination of a domestic product. Fluoridated Toothpaste.

Now, should the reader's mind be already boggled to the point of disbelief there are two facts which, if known about and/or remembered may instill sufficient confidence in that which is even more 'boggling' and is yet to come.

"Bromine (or bromide) Tea" was administered to the enlisted men during the First and Second World Wars. The halogen (bromine) ingredient was said to quell the libido of the men and thus limit likely forays into the 'dens of iniquity' and the acquisition of venereal disease. The second fact is that, today, all Australian military establishments provide their own halogenated (fluoridated) water for the troops resident therein, for the official reason that the element is good for the developing teeth.

Either we have a very immature military force, all under that age of twelve years when the mythical effect of fluoride ceases to exist or else there is another more obscure, less altruistic reason for this drug 'treatment' of the troops.

Later on in this text we will recall certain happenings relative to ex-trainees from these establishments and the paradoxical effects of fluorides on behaviour of the human being.

THE CARTEL

"Historians of the future will marvel most of all at the non-resistance of those who had the most to lose"
General van Horne Mosley.

The Parliamentary "Dickinson Statement" refers to "the vast Farben chemical plants in Germany".

It has been said by Antony C. Sutton in his book "Wall Street and the Rise of Hitler:- "Without the capital supplied by Wall Street there would have been no I.G. Farben in the first place, and almost certainly no Adolf Hitler and World War II."

Interessen Gemeinschaft Farben (Interessen Gemeinschaft der Deutschen Teerfarbenindustrie) or simply I.G. Farben, was a German chemical manufacturing concern that supplied the Chlorine Gas used by Germany during the first World War but the eventual creation of the huge I.G. Farben cartel began in 1924 when American bankers began to arrange foreign loans in what Professor Carroll Quigley terms 'the Dawes Plan' "largely a J.P. Morgan production".

In 1928 Henry Ford merged his German assets with I.G. Farben to be followed by the American Standard Oil Company who, in concert with I.G. Farben developed the coal to oil hydrogenation process.

In a letter to Roosevelt from Berlin in the early thirties U.S. Ambassador in Germany, William Dodd said:-

At the present moment, more than a hundred American corporations have subsidiaries here or cooperative understandings.

The DuPonts have their allies in Germany that are aiding in the armament business. Their chief ally is the I.G. Farben Company, a part of the government which gives 200,000 marks a year to one propaganda organization operating on American opinion.

Standard Oil Company . . . sent \$2,000,000 here in December, 1933 and has made \$500,000 a year helping Germans make ersatz [a substitute] gas [the hydrogenation process of converting coal to gasoline] for war purposes; but Standard Oil cannot take any of its earnings out of the country except in goods.

The International Harvester Company president told me their business here rose 33% year [arms manufacture, I believe], but they could take nothing out.

Even our airplanes people have secret arrangements with Krupps.

General Motors Company and Ford do enormous business here through their subsidiaries and take no profits out.¹¹

The I.G. Farben assets in America were controlled by a holding company, American I.G. Farben, which listed on its Board of Directors, Edsel Ford, President of the Ford Motor Company..... Chas. E. Mitchell, President of Rockefeller's National City Bank of New York.....Walter Teagle, President of Standard Oil of New York.....Paul Warburg, Chairman of the Federal Reserve and brother of Max Warburg, financier of Germany's war effortand Herman Metz, a director of the Bank of Manhattan, controlled by the Warburgs.

It is an interesting fact of history that three other members of the Board of American I.G. Farben were tried and convicted as German "war criminals" for their crimes against humanity" during World War 2, while serving on the Board of Governors of I.G. Farben. None of the Americans who sat on the same board as those convicted were ever tried as "war criminals".

Throughout the entire Second World War conflict not one bomb fell on the I.G. Farben headquarters in Frankfurt, (Germany) allegedly as a consequence of Allied orders.

In 1938 I.G. Farben borrowed 500 tons of tetra-ethyl lead, the gasoline additive, from Standard Oil.

During 1939, the year that Germany invaded Austria and Poland the Standard Oil Co., of New Jersey loaned I.G. Farben \$20,000,000 worth of high grade gasoline.

In 1939 the American Aluminium Company, (ALCOA) then probably the world's largest producer of Sodium Fluoride, transferred its technology to Germany, (the Alted Agreement) The Dow Chemical Co. transmitted its experience and technology in that same period.

Germany's two largest tank manufacturers were (1) Opel, a subsidiary of General Motors (J.P. Morgan) and (2) the German subsidiary of the Ford Motor Company.

Even with the purchase of oil from non-German sources the major supplier of oil was still the Farben cartel. The I.G.

Farben-Standard Oil co-operation for the production of synthetic oil gave the I.G. Farben cartel a monopoly on German gasoline production. Just under one half of the Germans' high octane gasoline in 1945 was produced directly by I.G. Farben, and most of the balance by its affiliated companies.

So in 1941 when cylinders of Zyklon B, the deadly cyanide based extermination gas, made by I.G. Farben were lethally unvalved on inmates of Auschwitz, Bitterfeld, Walfen, Hoechst, Agfa, Ludwigshafen and Buchenwald there were more than substantial links between huge American money sources and German industry and between American technology and German manufacturers.

Two questions must be asked here. (a) Was I.G. Farben associated with the formulation of "Sarin" and/or "Soman" the German developed fluorinated nerve gasses that made Zyklon B little more than an underarm deodorant by comparison and (b) what of I.G. Farben today. ?

The answer to (a) is an unequivocal YES!! As for (b) I.G. Farben signed cartel agreements with the such companies as Imperial Chemical Industries, Borden, Carnation, General Mills, M.W. Kellogg Co., Nestle's, and Pet Milk and I.G. Farben either owns outright, has had a substantial interest in or has had other cartel agreements with Owl Drug, Parke-Davis and Co., Bayer and Co., Whitehall Laboratories, Chef-Boy-Ar-Dee Foods, Bristol Meyers and Squibb and Sons. The list goes on and on and on and includes Proctor and Gamble who 'domesticated' the word 'fluoride', with official encouragement in 1958, being the originators of the infamous fluoridated toothpaste "CREST" campaign.

The only reference to "Farben" traceable in a limited search of modern literature, was in 25th., Edition of Martindale under "P.B.A. Pharmaceutical Limited; Products of Farbenfabriken Bayer".

All corporate traces of the huge I.G. cartel have been absorbed by the hundreds, if not thousands of one time cartel members but the 'malady lingers on' and is another story that is set out in detail in the second of this series of papers that deals with the 'pesticide' saga.

FOUNDATIONS

"The passion to regulate the lives of others is deep-seated in many individuals. When this is based on political expedience, it is bad, and when it is inspired by idealism which wishes to inflict benefits on others, it can become dangerous"
Sir Arthur Amies.

To take this story further it is necessary to mention the "Foundations".

In Australia the Dental Health and Research Foundation which has such names as Colgate, Kellogg and other ex I.G. Farben associates listed among its "governors and contributors" has been irreverently but accurately dubbed 'the fluoride mafia'. Closely allied with this Sydney University 'foundation', in its printed promotional claims for fluorides and fluoridation, is "Foundation 41". Unfortunately the data of the "thorough investigations" said to have been carried out by the latter 'foundation' into the halogen, (fluoride) its benefits and its hazards, have never been made available, despite numerous appeal. A recent ABC Science Show's examination of the scientific integrity of Fluodation 41 may explain the elusive (or is the word illusory?) data.

America is literally bursting at the seams with such Foundations, but amongst the earlier names were "The Rockefeller Foundation", "The Carnegie Foundation" and "The Ford Foundation". It is necessary to mention these specifically because they were the first Foundations to make grants in the population (control)

field and the Carnegie family merged with the Mellon family Institute to create the Carnegie-Mellon University in Pittsburgh in 1967.

The Mellon family were the founders of the original Mellon Institute from whence came the "amazing (but totally fallacious) Sodium Fluoride / dental caries prevention discovery". The 'discovery' that literally turned "garbage into gold". The Mellon family also founded the American Aluminium Company ("ALCOA"-vide ante) the largest producer of the waste toxin, Sodium Fluoride, which, up to this point of 'caries-discovery' had relatively little known commercial or industrial value, which was an environmental hazard of great public concern and which was very costly of ?safe? disposal.

So we retrace our steps to the Dickinson statement in Hansard and Chas Eliot Perkins.

In a letter, abstracted from "Fluoridation and Lawlessness" (pub., by Committee for Mental Health and National Security) to the Lee Foundation for Nutritional Research, Milwaukee, Wisconsin on October 2nd., 1954, a Charles Eliot Perkins, scientist and author of Washington DC and one must assume, that same Charles Eliot Perkins of the Dickinson statement to the Victorian Parliament, said this, and the words of the last two lines of the second paragraph can not be over emphasised.

"We are told by the fanatical ideologists who are advocating the fluoridation of the water supplies in this country that their purpose is to reduce the incidence of tooth decay in children, and it is the plausibility of this excuse, plus the gullibility of the public and the cupidity of public officials that is responsible for the present spread of artificial water fluoridation in this country.

"However — and I want to make this very definite and very positive — the real reason behind water fluoridation is not to benefit children's teeth. If this were the real reason there are many ways in which it could be done that are much easier, cheaper and far more effective. The real purpose behind water fluoridation is to reduce the resistance of the masses to domination and control and loss of liberty

"When the Nazis, under Hitler, decided to go into Poland . . . the German General Staff and the Russian General Staff exchanged scientific and military ideas, plans and personnel and the scheme of mass control through water medication was seized upon by the Russian communists because it fitted ideally into their plan to communize the world

"I say this with all the earnestness and sincerity of a scientist who has spent nearly 20 years' research into the chemistry, bio-chemistry, physiology and pathology of fluorine — any person who drinks artificially fluorinated water for a period of one year or more will never again be the same person, mentally or physically."

Mr. Perkins does not involve America, American institutions or individuals in his assertions but when Major George Racey Jordan was in charge of the massive 'lend lease airlift' operations from Great Falls, Montana, to Russia via Alaska, he queried the transshipment of considerable amounts of Sodium Fluoride via Fairbanks, Alaska, to Russia. He was told "frankly" that it was put into the drinking water in the prisoner of war camps to take away their will to resist".

The published knowledge that Sodium Fluoride was known for this mind and behaviour changing potential was available at the start of this century as witness such entries as "FLUORICUM ACIDUM" (page 333, Encyclopedia of Pure Materia Medica, Vol., IX)

America has long been interested in chemical behaviour and mind control by chemical means. Americans who were at once financiers, industrialists and population control advocates were intimately involved with Germany, where chemical extermination and chemical behaviour control by inter-alia, Sodium Fluoride, were placed into practice. America transferred this knowledge and material, inter alia, to Russia during its 'Lend-Lease' co-operation. An American major producer of Aluminium was the world's major source of Sodium Fluoride. An American 'education and research' funded by (a) the major Sodium Fluoride producer and (b) a "foundation" involved in population control, was the origin of "the dental caries prevention myth" associated with Sodium Fluoride.

A predominantly American Company was the first to exploit this concept in dentifrice production and American 'medical research' figured largely in the "fluorination" processes that converted the negative embarrassment of mounting industrial waste to huge positive profit increases. Processes that other countries hastened to emulate. Processes which included the enormous outlet for fluorides to the fluoridation of water supplies.

Although fertiliser production has not been a part of this thesis to this point the following 'connections' should be made. The manufacture of synthetic dyes, explosives and fertiliser are almost chemically synonymous and I.G. Farben was expert in all production phases of these 'necessities'. Sodium silico fluoride was a waste constituent from the refining of phosphate rock until a 'use' could be found or created for the waste.

A letter herein, from the United States Environment Protection Agency throws the spotlight on the unique 'waste disposal via the public kidney' concept that WAS created.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

MAR 30 1983

OFFICE OF
WATER

Leslie A. Russell, D.M.D.
363 Walnut Street
Newtonville, Mass. 02160

Dear Dr. Russell:

Thank you for your letter of March 9, 1983, in regard to the fluoridation of drinking water.

The information available to the Environmental Protection Agency is that fluoridation is a safe and effective means for reducing the occurrence of dental caries. The fluoridation process has been endorsed by several Presidents of the United States and by several Surgeons General, including the current Surgeon General, Dr. C. Everett Koop. A copy of Dr. Koop's statement on fluoridation is enclosed.

Water treatment chemicals, including fluosilicic acid, have been evaluated for their potential for contributing to the contamination of drinking water. The Water Treatment Chemicals Codex, published by the National Academy of Sciences, prescribes the purity requirements for fluosilicic acid and other fluoridation chemicals.

In regard to the use of fluosilicic acid as a source of fluoride for fluoridation, this Agency regards such use as an ideal environmental solution to a long-standing problem. By recovering by-product fluosilicic acid from fertilizer manufacturing, water and air pollution are minimized, and water utilities have a low-cost source of fluoride available to them. I hope this information adequately responds to your concern.

Sincerely yours,

Rebecca Hanmer

Rebecca Hanmer
Deputy Assistant Administrator
for Water

SO WHAT ?

"It was always tempting to over-ride the people and impose a new order"

Sir Rupert Hamer.

The question raised by the Hansard Dickinson statement and perhaps aggravated by this dissertation and data, is this:- Was the Australian Government, in 1962-3 when it illegally (Australian Constitution Section 51 (xxiiiA)) introduced "fluoridation of water supplies" to Australia, aware of its grotesque actions and of the grave results?? The 'shonky' method of introduction plus legal and official correspondence at that time, indicates in the affirmative.

Was the Crisp Royal Commission, when it 'found' in favour of fluoridation, and incidentally in favour of the major polluter and producer of fluoride in Tasmania (Electrolytic Zinc Corp., Risdon, ROBERT) aware of the consequences of any such favourable findings?? Conditions then and since mingle with some incredible documented coincidences and unbelievable, but documented official behaviour, including that of Premiers and Health Ministers, and the paucity of current State Parliamentary investigations into fluorine based environmental problems, to convince the most sceptical, that it was.

Was the Victorian Premier, who was later to publicly declare the dictatorial credo at the beginning of this part, aware of these background facts when he instituted indemnified water fluoridation legislation and a subsequent fraudulently conceived and executed cover-up "inquiry" (Ballarat Courier Oct., 6th., 1982). Irrespective of the obvious familial supplier advantages it seems certain that he was so aware?? Widespread publicity, regarding subsequent alleged complex land and company fraud transactions would seemingly underwrite the existence of the necessary character attributes to perform as implied.

Are the lies, denials, fabrications and evasions evident in Geelong with its TWO fluoride pollution sources (Aluminium smelting and fertiliser production) and Portland with ditto sources, no more than 'job protection' and 'rate protection' scares as is claimed, or is there a deeper, wider Federal or International instructional background behind the unmonitored

pollution with the health detriment therefrom and the "secrecy legislation" invoked for the Victorian Aluminium Industry.??

Is Mrs. Thatcher's astronomical expenditure of United Kingdom revenue on a "fluoridation campaign" in Northern Ireland, a matronly concern for the youngsters teeth or is it perhaps an attempt to sedate the people and render them subservient to her autocratic dictates.? Remember this. Mrs. Thatcher has a background of academic chemistry and would be far from ignorant of the tranquillising effects of the halogens and their halides.

Similarly her legal and political shenanigans (that is the only word to describe her behaviour) in the England fluoridation scene offer many avenues for questioning of her motives.

Are the lies, fabrications, omissions, evasions and official hysteria in the Federal Government and Federal bureaucracy, at the very mention of fluorides, fluoride pollution or water fluoridation, also common to the State Governments and State Government bureaucracies, and repeatedly backed up by the most lunatic science, (as witness the Ministerially approved and internationally derided propaganda from the National Health and Medical Research Council) Royal and Vice-Royal intransigence, a frightening exhibition of this grim foreknowledge, all of which has abundant documentary support, or simply no more than dastardly co-incidence.??

A MULTI-NATIONAL CAN OF WORMS

"The smallest worm will turn, being trodden on"
King Henry VI. Shakespeare.

The link between Colgate and 'mind control' was mentioned earlier. That company's reputation with fluoride as a toothpaste ingredient is a promotional legend, particularly in Kenya where a ban on the T.V. advertising of fluorinated toothpaste produced some extraordinary pecuniary persuasion from Colgate in attempts to preserve the 'status quo' for the company's benefit.

When official fluoridation corruption was exposed in New Zealand a 'scientific study' was hurriedly executed to try and justify the original government/industry claims and repair the damage done to the fluoride empire. The accreditation appended to that study is reproduced here with emphasis added.

ACKNOWLEDGMENTS

We are grateful to the Director and staff of the Division of Dental Health, Department of Health, for the administrative and logistic support in the Auckland area. In particular we wish to mention Supervising Dental Nurses R. Patchett and K. Hyde, and assistant V. Clarke for their excellent arrangements and help in contacting, screening, and arranging the transportation of children to the examination centres. Mr Garth Stewart, bus driver, contributed much above and beyond his normal duties. The tremendous help and co-operation from principals and staff of all schools is most appreciated.

Financial support for this study was provided by the Colgate Palmolive Company (NZ).

Earlier the name Kellogg was tied into the I.G. Farben corporate machinations. The words below are reproduced from the cover of a recent World Health Organisation (WHO) publication advocating fluoridation/fluorides. (Underlining added)

*Published under the joint sponsorship of the
International Dental Federation, the W.K. Kellogg Foundation,
and the World Health Organization*

APPROPRIATE USE OF FLUORIDES FOR HUMAN HEALTH

The intertwining, overlapping, interlocking co-incidence between erstwhile I.G. Farben companies and the continuing degradation of human health, our ecology and environment in exchange for the corporate dollar is virtually endless but simply as ONE example. The Nestle Company, once accused of selling nutritionally barren milk formula to third world babies has recently been found guilty of marketing "Pure Apple Juice" which was anything but "pure" and which had never been anywhere near an apple.

The Nestle Company has been nominated by The Ecologist as one of several multi-national companies involved in the destruction of "the lungs of the earth", the Brazilian rain forests.

IT REALLY GETS IN!

*"O that men should put an enemy in
their mouths to steal away their brains"
Othello. Shakespeare.*

The following pages make a slight transition from historically recorded fact and logic to indisputable fact, bio-chemical fact and medical literature fact.

The pharmaceutical nomenclature and bio-chemical data involves fluorine/fluorides with or without other ingredients, in virtually every phase of mind and behaviour control from mild sedation through 'controlled' unconsciousness to death.

'Side effects' of all drugs have in common the "paradoxical" characteristic of having an effect, on some individuals, exactly opposite that which was the intentional effect, converting for example, a tranquilliser into a potent stimulant, and thus the consumer from a 'pussy cat' into a slavering maniac.

Think back to the dosing of service personnel who are trained to hunt, maim and kill their fellow man while under the influence of this or other forms of chemical behaviour control and consider the possible reaction of such 'trainees' when discharged back into the mainstream of society.

Are any of the terrorist activities around the globe, including the otherwise inexplicable recent happenings in Australia, the grim result of such bio-chemical paradox.?

FLUORINATED PROPELLENTS (and refrigerants.)
The Fluoridated "Hole in the Ozone Layer".

Halogenated hydrocarbons, (sometimes called fluorocarbons or, when the name of the weapon must be changed to protect the guilty, just "C.F.Cs") are too numerous to list, being over 150 in number. In 'asthma' sprays the warning exists in all product literature (available only to the doctor, NOT TO THE PATIENT) :-
"Excessive use of such inhalers or abuse of any aerosol propellant may result in toxic effects on the heart and deaths have been reported". (Remember the term anti-cholinergic)

Another stark warning from 'restricted distribution' literature:-
"ABUSE. Of 110 deaths associated with the 'sniffing of solvents between 1962 and 1969, fifty-nine were related to the use of fluorinated aerosol propellents."

The most frequently used fluorides under this heading (with their identifying numbers in parenthesis) are:-

1. TRICHLOROFLUOROMETHANE (11)
2. DICHLORODIFLUOROMETHANE (12)
3. CHLOROTRIFLUOROMETHANE (13)
4. TETRAFLUOROMETHANE (14)
5. DICHLOROFUOROMETHANE (21)
6. CHLORODIFLUOROMETHANE (22)
7. TETRACHLORODIFLUOROMETHANE (112)
8. TRICHLOROFUOROETHANE (113)
9. DICHLOROFUOROTETRAETHANE (114)
10. CHLOROPENTAFLUOROETHANE (115)
11. DIFLUOROETHANE. (152a)

The side effects of exposure to these fluorides, ranging from the "more common" to the "rarely reported" are as follows:-

Cardiotoxicity (or heart injury), respiratory depression (or breathing difficulty), bradycardia (or slowed pulse rate), convulsions (or central nervous system effects), psychomotor aberrations (or brain dysfunction), transient sedation (or heart and lung effects), ataxia (or brain problems), irritation of the upper respiratory tract, rise/fall in blood pressure, apnoea (or impaired lung function damage), tachycardia (or increased pulse

rate) broncho-constriction, (or 'ASTHMA') palpitations, (or irregular heart beat), narcosis, (or brain, 'drugging'), anaesthesia, (or depression of heart, lungs, central nervous system performance), hallucinogenic effects (or brain 'drugging' again) and death.

All of the above 'side effects' are associated with either the acute or the chronic symptoms of "anti-cholinergic" toxicity. And there is that word "anti-cholinergic" again.

With a sufficient amount of these fluorocarbons (C.F.Cs) being used, in the 'aerosol' form alone, to threaten the world's atmospheric and climatic conditions through deterioration of the ozone layer, it is not remarkable that this volume represents an environmentally hazardous "anti-cholinergic, (or anti-metabolic, ganglion blocking) agent" for all humanity.

Discharges from certain industrial processes carry substantial amounts of gaseous fluoride. In particular, Hydrogen Fluoride when washed from the atmosphere by rain, forms a solution of Hydrofluoric Acid (.7ppm in Mojave Desert rainfall and .3ppm in Siberian snows) so these "anti-cholinergic" discharges, offer an additional threat by contributing to the "fluoridated hole in the Ozone Layer".

One must assume that it is owing to the enormous economic impact of this decaying ozone on the causal industries that sources of culprit industrial discharges have not featured in the current spate of international scientific concern nor in the records of the world's atmospheric/climatic monitors.

Note:- As an example of administratively approved industrial output, the first stage of the Portland (Victoria, Australia) Smelter was issued with a pollution licence to discharge to the environment, 70 tonnes per year of fluorides in gaseous and particulate forms. It is possible that this amount has been greatly exceeded because no monitoring of the discharges has thus far, been executed.

Within a short twelve months after start of smelting operations, an unknown but allegedly high number of potroom workers at the smelter have acquired "potroom asthma". A convenient euphemism for "anti-cholinergic" respiratory damage.

FLUORINATED PHARMACEUTICALS.
Fluorinated Income Generation.

In an effort to increase the bio-availability of the remedial ingredient or ingredients many pharmaceutical products are halogenated. There are still many chlorinated and a few brominated products designed as nostrums for human disease states. Of recent years the catalogue of FLUORINATED PHARMACEUTICALS has doubled and re-doubled until any representative listing would be beyond the scope of this paper. The proclaimed intention of the pharmacist, in fluorinating a product is to enhance still further its metabolic activity and therefore its alleged remedial qualities. For example:-

1. "FLUDROCORTISONE ACETATE has glucocorticoid actions about 15 times as potent as hydrocortisone (unfluorinated) and mineralocorticoid effects more than a 100 times as potent."

But, in potentiating the remedial effect, the undesirable side effects are also worsened and the 'therapeutic' industry gets an income from two sources. From treating the original disease condition and subsequently, from repairing the iatrogenic effects of the initial drug treatment:-

Literature Quote:- "Muscular weakness is an occasional side effect of most corticosteroids (hormones).....most evident with 1. "FLUDROCORTISONE" and 2. "TRIAMCINOLONE". (both fluorinated hormones) "It has been suggested that this effect is more pronounced when a fluorine atom is present in the 9th position."

A useful example here is FLUORINATED TOOTHPASTE which has the long term effect, not of improving dental health but by chronic anti-metabolic processes, of severely destroying it. Thus every Australian city with or without fluoridated water supplies has as much as doubled the number of registered dentists since the advent of FLUORINATED TOOTHPASTE, FLUORINATED GELS and FLUORINATED RINSES.

Or take the more extreme example of little Jason Burton, who had NON-PRESCRIPTION FLUORINATED DENTAL DECAY PREVENTION TABLETS (Sodium Fluoride) provided for him by loving parents who were in

total ignorance of their FLUORIDE TOXIC HAZARD. Jason ingested a lethal dose of these tablets and died. We only know about Jason because the doctor recognised, accurately and conscientiously REGISTERED the cause of his death. The existence of the death certificate, reproduced herein, has actually been denied by pro-fluoride Australian 'scientists' in reply to query from overseas scientists.

It should be clear from the foregoing and what follows that human disease conditions, ranging from "POT-ROOM ASTHMA" through the various perilous stages of "ANTI-CHOLINERGIC" response, to expiration, can be accidentally OR DELIBERATELY induced by an interminable list of FLUORIDE POLLUTION and FLUORINATED COMPOUNDS which include a FLUORINATED ENVIRONMENT, FLUORINATED ATMOSPHERE AND A FLUORINATED DRINKING WATER SUPPLY.

It may be difficult for the 'man in the street' to believe that a substance with so many industrial, commercial and medical 'applications' could be derived from or structured around a scientifically recognised toxic waste product. (See reproduction of U.S.E.P.A., letter). This thesis should illustrate that the chemical, pharmaceutical, commercial and political worlds are WELL AWARE OF THE DEADLY POTENTIAL OF THIS HALOGEN AND INTEND TO EXPLOIT THAT POTENTIAL TO EVERLASTING HUMAN DETRIMENT.

FLUORINATED TRANQUILLISERS.

or Fluoridated Acquiescence, Lethargy, Apathy, Stupidity.

There are two basic forms of halogenated "tranquilliser". Major and Minor. The minor tranquillisers are halogenated with either Chlorine or Bromine. The major tranquillisers, albeit of variable potency, are those numerically listed hereunder, which are all FLUORINATED. All are "ANTI-CHOLINERGIC AGENTS" with INTENTIONAL effects on central nervous systems allied with cardiac and respiratory depression. The figure after the hyphen is the number of "proprietary" products (Lower case) in each classification in addition to the base chemical (In CAPITALS).

- 1-3. BENPERIDOL. Anquil, Frenactil, Glianimon.
- 2-4. DROPERIDOL. Droleptan, Dridol, Inapsin, Inapsine.
- 3-1. FLUANISON. Sedalande.
- 4-1. FLUBUPERONE HYDROCHLORIDE. Buronil.
- 5-1. FLUNITRAZEPAM. Rohypnol.
- 6-3. FLUOPROMAZINEH. Psyquil, Siquil, Vesprin.
- 7-1. FLUOESONE. Bripidan.
- 8-1. FLURBIPROFEN. Froben.
- 9-0. FLUPENTHIXOL DECANOATE.
- 10-3. FLUPENTHIXOL HYDROCHLORIDE. Depixol, Fluaxol, Emergil.
- 11-0. FLUPHENAZINE DECANOATE.
- 12-0. FLUPHENAZINE ENANTHATE.
- 13-11. FLUPHENAZINE HYDROCHLORIDE. Modecate, Moditen, Anatenzol, Depotum, Lyogen, Omca, Pacinol, Sigualone, Permittil, Prolixin, Sevinol.

NOTES:- No.5 FLUNITRAZEPAM (Rohypnol) which is fluorinated VALIUM was recently prescribed for a youth in Western Australia and was blamed for his subsequent death.

VALIUM (Diazepam) was the "tranquilliser most involved" in road accident victims, according to a study carried out by the Sydney University (Prof. Graham Stamer, "QUANTUM" 26-4-88). An obvious question:- What aggravated effect would the increased potency of the fluorinated variety (Rohypnol) have on road fatalities.

Rohypnol and Valium are proprietary names of Roche products. Roche was a Swiss member of the I.G. Farben cartel and is probably more infamous for the terrible Stanley Adams family tragedy accurately immortalised in the film "A Song for Europe".

The ABC-TV program "7.30 Report" (12-5-88) told how the Western Australian penal system routinely administered both Serapax and Rohypnol (synergistic drugs) to prisoners to "make them into little robots most of the time". Including, it was alleged, throughout pregnancy.

- 14-2. FLURAZEPAM HYDROCHLORIDE. Dalmane, Dalmadom.
- 15-2. FLUSPIRILINE. Redeptin, Imap.
- 16-2. HALOPERIDOL. Haldol, Serenace.
- 17-1. PENFLURIDOL. Semap.
- 18-2. PIPAMPERONE. Dipiperon, Propitan.
- 19-18. TRIFLUOPERAZINE HYDROCHLORIDE. Amylozine Spansules, Stelabid Elixir, Stelabid Forte Tabs., Stelazine, Eskazine, Calmazine, Chemflurazine, Clinazine, Fluazine, Novofluazine, Pentazine, Solazine, Trifluoper-Ez-Ets, Triflurin, Jatroneural, Terfluzin, Terfluzine.

20-0. TRIFLUPERIDOL.

21-2. TRIFLUPERIDOL HYDROCHLORIDE. Triperidol, Psicooperidol.

A total of 21 fluorinated "tranquillising" compounds plus an additional 58 brand name 'major tranquillisers' using a fluoride as an ingredient. Undoubtedly many others have been added to this list since the reference work was published in June 1977.

Relevant Footnotes:-

Florida International University (Rotton, Tikovsky and Feldman) showed that:- "...minute amounts (0.45ppm) of Sodium Fluoride solution ...impair visual sensorimotor performance." J.A.P., Vol., 67:2." with a consequent slowing down in mental and physical reaction times (sedative or tranquillising effect). This finding is of relevance when driving or operating machinery, if of no other consequence. Nevertheless, attempts over a number of years, to draw the attention of those authorities allegedly concerned with driver/industrial safety, have been met only with silence or obstruction.

Early in 1987, Swedish researchers linked tranquillisers to birth defects, nominating (in Lancet) the drug benzodiazepine (Diazepam or VALIUM) as a particular culprit.

FLUORINATED ANAESTHETICS.

Fluorinated Unconsciousness.

(The PEN-ultimate in mind and behaviour control.)

As with "fluorinated tranquillisers" there are a number of anaesthetics halogenated with Chlorine and Bromine. The 'popular' modern anaesthetics are those listed here, which are all FLUORINATED. Once again all are "ANTI-CHOLINERGIC AGENTS" with intentional, designed effects on central human nervous systems, accompanied by cardiac and respiratory depression.

1. FLOOXENE.
2. ISOFLURANE. Forane.
3. METHOXYFLURANE. Penthrane.
4. ENFLURANE. Ethrane.
5. HALOTHANE. Fluorothane, Samothane.

Note:- There are scientific studies which demonstrate that the progeny of 'anaesthetists' have a higher rate of birth defect than does the general community. A significant statistic in the established peri-natal (S.I.D.S.) mortality/fluorine connection.

Some of the hazardous 'side effects' given in the medical literature for fluorinated anaesthetics are difficult to separate from those effects intended to induce a hopefully controllable unconscious state. For example, under "toxic effects" are listed "respiratory depression", "depressant action on the cardiovascular system", "bradycardia and profound hypotension" (or slowing pulse and a drop in blood pressure). "Hepatic dysfunction" (or liver damage), "Halothane blocks the transmission of nerve impulses through ganglia" (or central nervous system inhibition) "Cardiac arrest" (or death).

In other words, all of the "ANTI-CHOLINERGIC" effects variously intended, variously inherent, as are induced by the fluorinated propellants, fluorinated pharmaceuticals and/or fluorinated tranquillisers, and fluorinated exterminators.

So far these 'data' pages illustrate how fluorine and fluorination have been sold, packaged and/or prescribed for both public and professional credibility, on "health" grounds. The final page deals with the same halogen as it really is, really was and always will be, and as it is employed in those products

listed. One of the deadliest, multi-functional and insidious poisons known to mankind.

It is significant in the context of deliberate government mind control and physical chemical intervention, to note that in Australia the hazardous fluorinated anti-metabolic agents and anti-cholinergic agents enjoy Federal and State Government APPROVAL AND SUBSIDISED DISTRIBUTION, whilst the safe, nutritional substances, vitally necessary to combat and repair systemic chronic toxic injury wrought by the "free drugs" are available only at considerable cost to the victim. Furthermore the same bureaucracy that approved the 'killers' has sought to restrict public access to the remedial supplements. Some local Councils even infringe the laws of medical prescription and issue free Sodium Fluoride tablets for dosing of children without any warning, much less any advice on antidotes.

And those same Government instrumentalities and Ministerial 'heads' that oppose the ready availability of nutritional supplements are the same Ministers and public servants who lie, cheat, defraud, defame, blackmail and coerce to increase the distribution or compel the ingestion of fluorides and fluoride bearing products. The same as those who, in defiance of the Australian Constitution (Section 51(xciii)) legislated to have the chemical dumped into our drinking water supplies.

To sum up the above:- The killer drugs are approved, encouraged or enforced and SUBSIDISED while the vital, remedial nutrients and metabolites (rendered necessary by the 'free' hazardous drugs) are NOT SUBSIDISED, BUT AVAILABILITY IS OFFICIALLY DISCOURAGED AND OBSTRUCTED.

FLUORINATED EXTERMINATORS.

Fluoridated Death.

(The ULTIMATE in mind and behaviour control)

As with "tranquillisers" and "anaesthetics" chemical warfare gasses are halogenated. Riot control gases, tear gas or (lacrimators) employ either Chlorine (chlorinated eg., "MACE") or Bromine (brominated) as halogenators, but the lethal, German (IG Farben) developed, nerve gasses "Soman" and "Sarin" are both FLUORINATED and replaced the earlier chlorinated "Tabun" for speed and efficacy in killing the enemy, by their immediate ANTI-CHOLINERGIC AGENCY.

1. "SARIN". Isopropyl methyl-phosphonofluoridate.

2. "SOMAN". Pinacolyl methylphosphonofluoridate.

The almost immediate death caused by exposure to nerve gasses, is a result of instantaneous "blocking" of catalysis and nerve action by the fluorinated gas, by ACUTE ANTI-CHOLINERGIC AGENCY (enzymetic "blocking") and consequent cessation of heart and lung function.

Included here are two medical fluorinated compounds called:-

3. "DYFLOS". (Di-isopropyl Fluorophosphate) designed to treat, inter alia, the eye disease of glaucoma. It is described in the literature as an "irreversible cholinesterase inhibitor (ANTI-CHOLINERGIC AGENT) and the toxic effects may be prolonged. Systemic toxicity occurs after inhalation of the vapour."

4. "FLUOROURACIL". Uracil is an essential human metabolite. It is fluorinated in an "last resort" attempt to control the growth of, and/or destroy cancer cells through enzyme (D.N.A. and R.N.A.) "blocking" activity. The toxic effects are severe and sometimes fatal. It is often paradoxical in action and actually provokes cancer. 'Side effects', all severe and numerous are those associated with other fluorinated ANTI CHOLINERGIC AGENTS set out previously. The physiological consequences attending this deliberate fluorination of a human metabolite illustrates the deadly peril of any fluorination process but in particular, the fluorination of a vital metabolite, (rendering it ANTI-metabolic in action) human electrolyte or essential nutrient such as WATER.

5. FLUOROACETAMIDE (COMPOUND 1081). Another instance of an vital metabolite, 'acetamide' being converted (halogenated) to a potent anti-metabolite by fluorination. (In Britain this product, a close chemical cousin to the stuff used to fluorinate water supplies and toothpaste etc., "is restricted to the extermination of rats in ships and sewers").

6. HYDROFLUOSILICIC ACID. (Fluorosilicic Acid, Hydrofluoric Acid) These are toxic 'waste products' of the fertiliser industry and are now used for FLUORIDATION OF DRINKING WATER.

"Warning (quoted from medical literature):- INHALATION HAZARD. Inhalation of Hydrofluorosilicic Acid from soaked cotton clothing could cause irreversible lung damage in ONE MINUTE." due to "ANTI-CHOLINERGIC ACTIVITY".

7. SODIUM FLUORIDE. FLUORIDATION OF DRINKING WATER.

A 'waste product' of the Aluminium Industry. This hazardous INTRACTABLE GARBAGE has become, by dint of promotion and sly public re-education, the active ingredient in fluorinated pesticides, fungicides, nematocides, rodenticides, anaesthetics, tranquillisers, fluorinated medications (pharmaceuticals), A number of industrial and domestic products, fluorinated dental gels, rinses and toothpastes.

In other words so much a part of multi-billion dollar industrial and pharmaceutical income that any withdrawal, FOR ANY REASON, by the promoters, the fluoridationists or by anyone who has supported them for whatever purpose, is IMPOSSIBLE on a financial basis, embarrassing on a reputation basis and unthinkable on a LEGAL basis.

8. SODIUM FLUOROACETATE (COMPOUND 1080). As 5 above. This seems to be the preferred "exterminator" for rodents etc., on the proclaimed grounds that it is slightly less hazardous for humans. Death by 1080 will take a little longer, be slightly less painful than death by 1081. It will however be no less permanent.

9. SODIUM SILICOFLUORIDE. FLUORIDATION OF DRINKING WATER

A waste product of the Fertiliser Industry. It must be removed, by International Law from fertiliser so that pastures, crops, sheep and cattle will not be harmed. That it is then sold for

disposal through the community kidneys is NOT a matter of international concern. Until this more profitable use was found, it was used almost exclusively as an insecticide and rodenticide. An EXTERMINATOR.

While this thesis is directed at the 'grass roots' where people are most likely to be affected (as a result of being screened from the truth) there will be some who, retaining the foolish but implanted 'reference complex' will need to verify the content. This will be a simple matter from their own or public library sources without biased prompting by the author.

That said, the author acknowledges the considerable value of the following, for evidential support of this thesis:-

- "Martindale. The Extra Pharmacopoeia". Editions Nos., 25 and 27.
- "Encyclopaedia Britannica". Edition No. 15.
- "The Unseen Hand" by Ralph Epperson.
- "The Case Against Fluoridation". by Lee Hardy.
- "Operation Mind Control" by Walter Bowart.
- "World Without Cancer" by G. Edward Griffin.
- "The Crime and Punishment of IG. Farben" by Joseph Borzkin.

Certain unrefuted, unchallenged correspondence, allegations and scientific papers by the author.

EPILOGUE

Since it was the Parliamentary activities of Harley Rivers Dickinson, Member for South Barwon (Victoria) that prompted the research that led to the writing of this thesis, it is fitting that the epilogue should refer to more representational work on the same subject, (fluoridation of water supplies) by the same member in the same Parliament.

In February of the year 1983 Harley Dickinson placed two 'questions on notice' to the then Minister for Health, T. Roper, on behalf of his Geelong district constituents. The first question was in 10 parts and the second in 8 parts affording some excuse for a delay in preparing comprehensive answers.

In any case the people would not wish questions on matters, vital to their health, to be answered without due consideration.

The questions were answered and recorded in Hansard of April 7th., 1988, by the now displaced T. Roper, on behalf of the present Minister for Health D. White, MORE THAN FIVE YEARS AFTER THE ASKING.

A period of waiting, intolerable in a health matter even were the questions answered in a generally responsible fashion, which they certainly were not.

Without going into the detail of the questions and answers, having pointed out the extreme and perilous lassitude of the State Government, suffice to remark that the answers varied from patent falsehood to inadvertant exposure of Ministerial fraud.

From the repeated quoting of proven fraudulent 'evidence' to accurate but selected part quotations of literature evidence.

From admissions of impropriety by the Victorian bureaucracy to baseless assertions.

CONCLUSION

This story is full of overlapping, interwoven, interlocking circumstance beyond the statistical or reasonable bounds of chance or coincidence. Pursuing each facet, each tortuous avenue from The Dickinson Statement as a starting point, will confound and dumbfound the 'pursuer' with still more "mind boggling" information.

The histories of Cecil Rhodes, Rhodes Scholarships and its recipients. The Fabian Society, The Bilderbergers, The Federal (USA) Reserve, The Illuminati, International Banking, The House of Rothschild, General Aniline and Film, are just a few of the 'avenues' to be explored, that will make your hair 'stand on end:

"Obscurum per obscurius" [L]

(Explaining) the the obscure by means of the more obscure.
