

in Modern Dentistry

According to the chart, an imbalance or disease in the descending part (left) of the colon creates disturbances in the area of tooth - 6, 7 (US 19, 18) which can lead to toothache - decay or gingivitis - periodontal disease. If the dentist is aware of this relationship, possibly many unnecessary drilling procedures and eventual root canal treatments could be avoided and the casual area treated by use of natural remedies/means in a holistic approach. On the other hand a high electrical current reading of an amalgam filling or root filling on tooth 6, 7 (US 19, 18) can cause aggravation to the large intestine, causing constipation, etc.

According to leading therapists using Applied Kinesiology negative emotions weaken particular organs

and the "virtue" qualities seem to strengthen the same organs. So our state of mind/psyche has a definite direct or indirect impact on oral health. Reading of the facial appearance (inspired by old Chinese visual diagnosis) gives us similar indications of imbalances in the body.

Tomorrow's dentist will, through re-education and cross-barrier collaboration with other professional healthcare practitioners, see that dental problems reflect multiple aspects of improper metabolism according to hematology, blood serum hematology, blood serum chemistry, immunology, endocrine evaluation, dietary factors, electrical status, urinary excretions as well as functional oxygen levels which reflect life energy capacity.

As dentists we can now start to heal the historical wounds and destruction that we created by following standard dentistry, in its linear, local orientation.

The raising awareness of the immediate necessity for cleansing the planet of heavy metal poisoning and pollution directly correlates to its counterpart in the individual human body, inner air and waterways. Client as well as dentist, consider your actions carefully. The choice is yours. Use it wisely!

Jorgan Hartz will be in New Zealand from early November until April 1992. He and Caitlin Catley will be available for lectures and consultations in Holistic Dentistry, Craniosacral Therapy and Quality Circles.

The teeth and their relationship to the rest of the organs
